

PROCREATE TOP TIPS

10 TIPS FOR USING PROCREATE

Below are 10 tips to help you get started with using Procreate.

1. Organise your content. Procreate allows you to create an organised gallery where you can stack artwork into folders. This is useful if you want to organise your art therapy products or content into folders for your clients to access.
2. Apply a screen protector.
3. Learn the concept of layers. This will allow you more flexibility to manipulate and create your artwork.
4. Learn gestures. Learn the basics of making gestures on the iPad so you don't have to rely on the Pencil. Eg. Double tap to undo, 4 finger tap to maximise the screen, zoom in and out etc
5. Learn to import. The creative process can be amplified once you learn how to import other digital media to incorporate into your artwork.
6. Learn to export. Learning this process will enable you to export your client's artwork and save it to your client files so that the artwork can be removed from any iPads that are used by multiple clients.
7. Learn Quickshape to help create quick shapes
8. Create a collection of colour palettes that your clients may like to use together. Eg skin tones, neon colours etc
9. Explore how to journal as part of the art making process using different fonts as well as your client's handwriting.
10. Create a handy cheatsheet for your clients to use Procreate. You may want to create an easy exercise that introduces your client to how they can use Procreate. This will reduce frustrations and limit time wasting on learning the basic functions
